Annex 1: GMD licence schedules

GMD Number	Name	Date of Submission	Date of termination	Type of Mining	Area (Ha)
528/19	N.V. Gadu Manda Wang Kai	1/15/2020	1/15/2025	Exploration	1452
529/19	N.V. Gadu Manda Wang Kai	1/15/2020	1/15/2025	Exploration	2920
530/19	N.V. Gadu Manda Wang Kai	1/15/2020	1/15/2025	Exploration	3120
662/20	A.C. Bos Gold Mining N.V.	5/21/2020	5/21/2023	Exploration	14368
569/20	AANNEMINGS - MAATSCHAPPIJ BAITALI	4/8/2020	4/8/2025	Building Materials	375
646/20	Aannemings- Maatschappij Baitali N.V.	4/25/2022	4/25/2025	Building Materials	400
568/17	AANNEMINGSBEDRIJF KOEMAN N.V.	6/24/2020	6/24/2023	Building Materials	200
651/20	Abilo Mining N.V.	5/7/2020	5/7/2023	Exploration	18822
652/20	Abilo Mining N.V.	5/7/2020	5/7/2023	Exploration	37758
675/20	ACINON Resources N.V.	7/2/2020	7/2/2023	Exploration	931841
575/20	Adishkumar R. P. Ramsoekh	6/29/2020	6/29/2025	Building Materials	200
558/19	Agnesia Mijnbouwonderneming N.V.	7/7/2020	7/7/2025	Exploration	6524
686/20	AIM HIGH CO. N.V.	6/18/2020	6/18/2023	Exploration	1180
800/20	AIM HIGH CO. N.V.	7/13/2020	7/13/2023	Exploration	4825
436/19	AKANTOINA INTERNATIONAL N.V.	7/13/2020	7/13/2025	Exploration	4027
246/15	ALEXANDER GOLDMINING N.V	5/2/2020	5/2/2030	Exploration	4000
860/21	Amirullah, Mumtaz Ali	12/21/2022	12/21/2032	Exploration	5038
726/20	Anjisa Wood & Mining N.V.	7/13/2020	7/13/2023	Exploration	8745.62
727/20	Anjisa Wood & Mining N.V.	7/6/2020	7/6/2023	Exploration	12994
016/22	Ararat Gold and stone N.V.	7/12/2022	7/24/2025	Building Materials	375
714/20	ARRIFA MINING N.V.	6/7/2022	6/7/2025	Building Materials	200
868/21	ARRIFA MINING N.V.	6/7/2022	6/7/2026	Building Materials	2150
238/18	Asadanoe Adriaan	6/15/2020	6/15/2022	Exploration	343
412/16	Augusta Mining N.V.	6/29/2020	6/29/2025	Exploration	3285

GMD Number	Name	Date of Submission	Date of termination	Type of Mining	Area (Ha)
435/16	Augusta Mining N.V.	7/10/2020	7/10/2025	Exploration	1274
544/19	B.S.P. MINESTONE RESOURCES N.V.	7/9/2020	7/9/2025	Building Materials	200
519/19	Babel Gwendoline C.	5/15/2020	5/15/2023	Building Materials	196
647/20	BAITALI MINING N.V.	11/7/2022	11/7/2025	Building Materials	400
649/20	BAITALI MINING N.V.	11/7/2022	11/7/2025	Building Materials	400

**Statement on Definition Beneficial Ownership
By MSG EITI Suriname**

Background

The EITI Standards and Requirements for Beneficial Ownership (BO) state that,

The MSG should agree an appropriate definition of the term beneficial ownership. The definition should be aligned with requirement 2.5(f)(i) and take international norms and relevant national laws into account, and should include ownership threshold(s). The definition should also specify reporting obligations for politically exposed persons. (Requirement 2.5 (f)(ii))

As it was apparent that the MSG would need guidance on the legal implications in the Suriname context, the Ministry of Natural Resources commissioned a study in September 2020 for the legal assessment of the institutional framework for BO in Suriname. The study also provided recommendations for the first steps of BO implementation. The results of the assessment were presented to the MSG and discussed. Subsequently, a MSG BO working group was created with one representative from each stakeholder group.

In February 2021, the MSG held a workgroup session on the definition of beneficial ownership for Suriname. Each stakeholder group agreed to provide feedback within a period of several weeks. As most companies had to receive feedback from their legal departments, the process took more time than originally foreseen. However, all stakeholders responded positively.

The definition in conformity with EITI requirement and as agreed by the Multi-Stakeholder Group EITI Suriname is hereby attached.

Publication

This definition will be made public by all MSG stakeholders, published on the EITI Suriname website and referenced in the EITI Suriname report.

Beneficial Ownership (BO)

1. A 'beneficial owner' means any natural person(s) who ultimately owns or controls a legal entity or a legally binding arrangement, and/or the natural person(s) on whose behalf a transaction is carried out or an activity is conducted.
2. A natural person shall be deemed to "own or control" a legal entity or a legally binding arrangement, if that person:
 - a. ultimately owns or controls a legal entity through direct or indirect ownership of at least 20% of the shares or voting rights or ownership interest in that entity, including through bearer shareholdings, or through control via other means; or
 - b. is able to exercise at least 20% of the votes in the case of resolutions amending the articles of incorporation of the legal entities; or
 - c. has the right to appoint, veto the appointment or remove a majority of the board of directors or equivalent body of a legal entity or a legally binding arrangement; or
 - d. is able to exercise effective control over the legal entity or legally binding arrangement; or
 - e. derives significant economic benefit from a legal entity or a legally binding arrangement.
3. In case the legal entity is a "Stichting" or a similar legal entity, then all following persons shall be deemed beneficial owners of the legal entity:
 - a. the board member(s);
 - b. the beneficiaries, or where the individuals benefiting from the legal entity have yet to be determined, the class of persons in whose main interest the legal arrangement or entity is set up or operates;
 - c. any other natural person exercising ultimate control over the legal entity;
4. In case the legally binding arrangement is a "Trust" under foreign law or a similar legally binding arrangement, then all following persons shall be deemed beneficial owners of the legally binding arrangement:
 - a. the settlor(s);
 - b. the trustee(s);
 - c. the protector(s), if any;
 - d. the beneficiaries, or where the individuals benefiting from the legal arrangement or entity have yet to be determined, the class of persons in whose main interest the legal arrangement or entity is set up or operates; and
 - e. any other natural person exercising ultimate control over the trust by means of direct or indirect ownership or by other means;
5. In case the natural person is a Politically Exposed Person, any direct or indirect ownership or control of a legal entity or a legally binding arrangement by that person will constitute beneficial ownership, irrespective of the actual level of ownership or control.
6. For the avoidance of doubts, agents, nominees, trustees and other intermediaries shall not be deemed to be a beneficial owner.

7. In the case of a joint venture, each entity within the venture should disclose its beneficial owner(s).

Paramaribo, August 6th, 2021

Politically Exposed Person (PEP)

1. A 'politically exposed person' means a natural person who is or who has been entrusted with prominent public functions and includes the following:

- a. heads of State, heads of government, ministers and deputy or assistant ministers;
 - b. members of parliament or of similar legislative bodies;
 - c. members of the governing bodies of political parties;
 - d. members of supreme courts, of constitutional courts or of other high-level judicial bodies, the decisions of which are not subject to further appeal, except in exceptional circumstances;
 - e. members of courts of auditors or of the boards of central banks;
 - f. ambassadors, chargés d'affaires and high-ranking officers in the armed forces;
 - g. members of the administrative, management or supervisory bodies of State-owned enterprises;
 - h. directors, deputy directors and members of the board or equivalent function of an international organization and their family members and persons known to be their close associates.
- No public function referred to in points (a) to (h) shall be understood as covering middle-ranking or more junior officials;

2. A 'family member' of a politically exposed person includes, but is not limited to, the following:

- a. the spouse, or a person considered to be equivalent to a spouse, of a politically exposed person;
- b. the siblings, children, grandchildren, and their spouses, or persons considered to be equivalent to a spouse, of a politically exposed person;
- c. the parents and grandparents of a politically exposed person;

3. A 'person(s) known to be close associates' of a politically exposed person(s) includes, but is not limited to, the following:

- a. natural persons who are known to have joint beneficial ownership of legal entities or legal arrangements, or any other close business relations, with a politically exposed person;
- b. natural persons who have sole beneficial ownership of a legal entity or legal arrangement which is known to have been set up for the de facto benefit of a politically exposed person.

Paramaribo, August 6th, 2021

Annex 5: Narrative on Minerals institute

The Minerals Institute for Suriname: Progress and Future Plans

Introduction

The establishment of the Minerals Institute for Suriname, officially known as "Delfstoffen Autoriteit Suriname" (DAS), represents a significant milestone in Suriname's efforts to strengthen mining sector governance, transparency, and sustainable development. This initiative is part of the broader Suriname Competitiveness and Sector Diversification (SCSD) Project, funded by the World Bank, which aims to support improvements in the legal, regulatory, and institutional frameworks governing mining in Suriname. The creation of DAS is designed to address the growing challenges in the mining sector, including the need for better regulation, monitoring, and sustainable management of mineral resources.

Progress on Establishing the Minerals Institute for Suriname

The journey toward establishing the Minerals Institute began with several foundational studies, including the British Geological Survey (BGS) 1998 document "A Preparatory Study for Establishing a Minerals Institute in Suriname" and subsequent reports that outlined the conceptual framework for the institute. These early efforts laid the groundwork for what would eventually become the DAS, envisioned as an autonomous authority responsible for the promotion, coordination, regulation, monitoring, and inspection of Suriname's mining industry.

Significant progress has been made since 2020 under the SCSD project, which has a specific component focused on strengthening mining sector governance. The project has supported the development of the organizational structure for DAS, which will integrate and strengthen three key functions: mining cadaster, geological data management, and mining inspection. International consultants, including GAF AG from Germany and International Geoscience Services (IGS), were contracted in 2023 to support the establishment and commissioning of the Minerals Institute.

As of October-2022, the project has moved from the planning and assessment phase to the implementation phase, with the transition of three technical departments—Geological Mijnbouwkundige Dienst (GMD), Ordening Kleinschalige Goudsector (OKGS), and Bauxiet Instituut Suriname (BIS)—into the new DAS structure. This transition represents a significant step forward in consolidating mining governance under a single, more efficient authority.

Current Status of the Plans

Currently, the establishment of DAS is in the transition phase, with the three technical teams being supplemented with new staff members to effectively carry out the described tasks. The organizational structure has been defined, with DAS comprising three main technical departments: Geological Survey (GS), Cadaster Unit (CU), and Mining Inspection Department (MID), supported by an Office Support division.

The Geological Survey department is responsible for investigating and managing geological data, supporting mining and infrastructure development, and creating geological maps and models for sustainable decision-making. The Cadaster Unit handles applications and registration of mining rights, playing a crucial role in property management by integrating legal, institutional, and technological aspects. The Mining Inspection Department is tasked with monitoring and enforcing regulations in the mining sector, conducting inspections at mining sites to ensure compliance with safety, environmental, and operational regulations.

A Change Management Plan has been developed for DAS, outlining strategies for organizational change, communication, stakeholder management, and implementation steps. Additionally, an onboarding program for new employees has been established, including mentorship, training sessions, and evaluation moments. An Employee Handbook has also been created, detailing organizational policies, job descriptions, behavioral rules, and compliance guidelines.

Future Plans for the Minerals Institute

The future plans for DAS focus on completing the transition from the current fragmented governance structure to a fully operational, autonomous authority. This includes finalizing the legal framework through the approval of the Draft Mining Law and the Draft Law on the establishment of DAS.

A key aspect of future plans is the implementation of the HR Strategy, which has been benchmarked against international standards and includes change management and action plans, as well as a training strategy for capacity development. The strategy aims to address the challenge of developing and retaining human resources, stopping the brain drain from the public sector, and building capacity to negotiate with large mining companies and address challenges related to artisanal and small-scale mining.

Another important element is the development of a business plan for DAS, which will outline how the authority will operate with an autonomous financial balance sheet that allows it to function and reinvest. According to the proposed governance model, DAS will be financed with a percentage of royalties and fees, services rendered, penalties, and with budget allocations as part of the state budget process.

The future plans also include the full implementation of the mining cadaster system, the strengthening of the geological survey capabilities, and the enhancement of the mining inspectorate's capacity to monitor and enforce regulations. This will involve the installation of a server with a fully functioning cadaster tool, the purchase of computers, and continued training and coaching of staff for all three technical departments.

Draft Mining Law

The Draft Mining Law represents a significant update to Suriname's mining legislation, which is currently governed by the Mining Decree of 1986. The process of revising the mining law has been ongoing for several years, with a draft presented to parliament in 2004 but not adopted. In recent years, the government established the Commission for the Amendment of the Mining Law, tasked with reviewing and updating the draft for submission to parliament.

The new Draft Mining Law aims to address key weaknesses in the current Mining Decree, including the integration of environmental and social impact assessments (ESIAs), indigenous rights, and Maroon ethnic minority rights. It also seeks to increase financial penalties for non-compliance and infractions and enhance transparency requirements to help meet Suriname's future Extractive Industries Transparency Initiative (EITI) obligations.

As of mid-2024, the Draft Mining Law has been sent to stakeholders for review, comments, input, and feedback. The Multi-Stakeholder Group (MSG) of the Suriname EITI participated in the first consultations of the revised mining law in September 2023, with members from all constituencies present. During these consultations, it was emphasized that the consultant should include more of the EITI requirements in the law in accordance with the new 2023 standard.

Draft Law DAS

The Draft Law on the establishment of the Minerals Authority Suriname (DAS) is a critical piece of legislation that will provide the legal foundation for the new authority. This law will define the governance structure, functions, responsibilities, and operational framework of DAS.

According to the proposed model, DAS will be a financially and administratively independent entity, ruled by a Board of Directors (the "Governing Board") and managed by an Executive Director ("the Managing Director"). The Governing Board will be composed of six members, including three Government representatives and three independent members, with the Minister of Natural Resources serving as the Chair.

The Draft Law DAS has been prepared by the Government and, like the Draft Mining Law, has been sent to stakeholders for review, comments, input, and feedback. The approval of this law is essential for the formal establishment of DAS and the transition from the current institutional arrangement to the new authority.

Completion of the HR Strategy

The HR Strategy for DAS has been developed as part of the SCSD project and is now in the implementation phase. The strategy has been benchmarked against international standards and includes three main components: an HR strategy and implementation plan, a change management and action plan, and a training strategy for capacity development.

The HR Strategy addresses the challenge of developing and retaining human resources in the mining sector, which has been identified as a key issue in previous assessments. It aims to create a professional, competent workforce that can effectively carry out the functions of DAS, including policy implementation, licensing, monitoring and compliance, geodata management, and addressing challenges related to artisanal and small-scale mining.

A significant aspect of the HR Strategy is the change management plan, which outlines strategies for organizational change, communication, stakeholder management, and implementation steps. This plan is crucial for managing the transition from the current institutional arrangement to the new DAS structure.

Set up of the Mining Cadaster, Geological Survey, and Mining Inspectorate Department

The setup of the three technical departments of DAS—Mining Cadaster, Geological Survey, and Mining Inspectorate—is a key component of the SCSD project. International consultants, including GAF AG and IGS, have been contracted to support this process, with GAF AG focusing on the Mining Cadaster and IGS on the Geological Survey.

Mining Cadaster

The Mining Cadaster Unit is being developed to modernize and improve the management of mining rights in Suriname. Currently, the application process for mining rights starts at the Geological Mijnbouwkundige Dienst (GMD), where applications are checked against requirements stated in the Mining Decree. The new cadaster system will streamline this process and enhance transparency and efficiency.

GAF AG was responsible for the assessment and development of a roadmap for the implementation of a revised and modernized cadaster system. This includes defining the technical requirements, designing the system architecture, and planning for the installation of a server with a fully functioning cadaster tool.

Geological Survey

The Geological Survey department is being established to strengthen Suriname's capacity to generate and manage geological data. The current capacity of GMD is far from the required standards of a national geological survey, with low levels of computerization and most information existing only in paper formats.

IGS was responsible for the development and early-stage implementation of a roadmap for the new Geological Survey. An important component of this work is identifying key geoscience and geodata programs that will attract investor interest in the country. The roadmap includes plans for digitizing existing data, acquiring new geological information, and developing the capacity to analyze and interpret this data [4].

Mining Inspectorate

The Mining Inspectorate Department is being set up to enhance monitoring and enforcement of regulations in the mining sector. Currently, the Inspection Department has limited resources and is unable to effectively control gold operations, focusing mainly on monitoring the extraction of building materials.

Training for mining inspectors has been a key focus, with a comprehensive training program conducted from April 8 to May 3, 2024. This training, which included both theoretical and practical components, aimed to enable inspectors to conduct inspections according to international standards. The theoretical part covered topics such as creating quality field reports and setting up field plans, while the practical component involved field inspections of large-scale and small-scale gold mining operations, as well as building materials such as sand and crushed stone.

Completion of the SESA

The Strategic Environmental and Social Assessment (SESA) for the mining sector in Suriname is a comprehensive examination of potential impacts, both positive and negative, of future development in the mining sector. It aims to identify gaps in regulations, institutional capacity, and public consultation mechanisms that can be strengthened.

The SESA process has involved extensive stakeholder consultations, with the goal of ensuring that the concerns and expectations of different stakeholders are taken into account in the decision-making process for equity and sustainable development of Suriname's mining sector. The assessment has followed a structured approach, including scoping, baseline studies, scenario development, impact assessment, and the formulation of recommendations.

Next Steps

The next steps in the establishment of DAS and the strengthening of mining sector governance in Suriname include:

1. **Business Plan for DAS:** Development of a comprehensive business plan that outlines how DAS will operate with an autonomous financial balance sheet, including revenue sources, expenditure plans, and investment strategies.
2. **Installation of a Server with a Fully Functioning Cadaster Tool**:** Implementation of the technical infrastructure needed for the modern mining cadaster system, including servers, software, and databases.
3. **Purchase of Computers and Equipment:** Acquisition of the necessary hardware and equipment for all three technical departments of DAS.
4. **Training and Coaching of Staff:** Continued capacity building for staff in the Mining Cadaster, Geological Survey, and Mining Inspectorate departments, building on the training already provided.
5. **Approval of Draft Mining Law and Draft Law DAS:** Finalization and approval of the two key pieces of legislation that will provide the legal foundation for the new mining governance framework and the establishment of DAS.

These next steps are critical for the successful transition to the new institutional arrangement and the achievement of the objectives of the SCSD project, which aims to support sector governance improvements and increase competitiveness in Suriname's mining industry.

The establishment of the Minerals Institute for Suriname (DAS) represents a significant step forward in strengthening mining sector governance, transparency, and sustainable development in the country. Substantial progress has been made under the SCSD project, with the organizational structure defined, key personnel being trained, and the transition from the current institutional arrangement to the new DAS structure underway.

The success of this initiative will depend on the completion of several critical next steps, including the approval of the Draft Mining Law and Draft Law DAS, the implementation of the HR Strategy, the full setup of the three technical departments, and the development of a comprehensive business plan for DAS. With continued support from the World Bank and other partners, Suriname is well-positioned to establish a modern, efficient, and effective mining governance framework that can maximize the benefits of its mineral resources while ensuring environmental and social sustainability.

Disclaimer of Opinion by the Supreme Audit Institution of Suriname

Issued in Accordance with INTOSAI Standards and EITI Standard 2019 Requirements 4.9 and 6.5

Title:

Independent Statement on the Reliability of Government Revenue Data for the Extractive Sector – Fiscal Years 2021 and 2022

Issued by:

Rekenkamer van Suriname (Supreme Audit Institution of Suriname)

Applicable Standards:

This audit statement has been prepared in accordance with the International Standards of Supreme Audit Institutions (ISSAIs), specifically ISSAI 100 (Fundamental Principles of Public Sector Auditing), ISSAI 400 (Compliance Audit), and ISSAI 3000 (Performance Audit), in line with our mandate under the Extractive Industries Transparency Initiative (EITI Standard 2019).

1. Mandate and Objective

As the Supreme Audit Institution of Suriname, we conducted a compliance audit to assess the reliability and completeness of government-reported revenues from the extractive sector, as disclosed under the Extractive Industries Transparency Initiative (EITI) for the financial years ended 31 December 2021 and 31 December 2022.

The objective of this audit was to determine whether the extractive revenue data reported by the Suriname Revenue Authority (Belastingdienst), the Ministry of Finance and Planning, and the Ministry of Natural Resources meets the expectations of transparency, accountability, and public financial integrity, as defined under the EITI Standard 2019, specifically Requirement 4.9 (Data quality and assurance) and Requirement 6.5 (Documentation of audit and assurance procedures).

2. Scope and Limitations

In carrying out our audit, we requested access to supporting documentation, revenue records, reconciliation reports, and internal systems related to government income from extractive companies for the years in scope.

Despite formal engagement and repeated follow-ups, we encountered material limitations due to the following:

The Suriname Revenue Authority failed to provide verifiable audit trails to substantiate reported tax and royalty revenues, and its records lacked traceable links to EITI submissions;

The Ministry of Finance and Planning submitted incomplete, inconsistent, and unaudited figures, with no underlying documentation to validate EITI disclosures;

The Ministry of Natural Resources did not produce contract-level documentation, confirmations of production royalties, or validated license fee information.

These pervasive shortcomings restricted the scope of our audit and prevented us from applying core ISSAI audit procedures needed to evaluate the accuracy, completeness, and reliability of the reported figures.

3. Disclaimer of Opinion

Due to the scope limitations detailed above, we were unable to obtain sufficient and appropriate audit evidence to form a basis for any form of assurance. Accordingly, we do not express an opinion on whether the extractive sector revenue data disclosed by the Government of Suriname for the fiscal years 2021 and 2022 is reliable, complete, or free of material misstatement.

The nature and extent of the deficiencies are such that we could not determine whether any adjustments might have been necessary. In accordance with ISSAI 100, paragraph 41, and consistent with our constitutional role, we are obliged to disclaim an opinion under these conditions.

4. Purpose of this Statement

This independent statement is issued to fulfill the assurance expectations set by the EITI Standard 2019, in particular:

Requirement 4.9: That EITI data disclosed by government agencies should be subjected to credible, independent verification or assurance measures;

Requirement 6.5: That the audit and assurance procedures used to support the data should be transparently documented.

We urge the Surinamese authorities to strengthen their data management, internal auditability, and public financial control systems to ensure that future EITI disclosures are credible and in line with both international audit standards and the principles of the EITI.

Signed,

Mr. drs S. Bhoendie

(President of Rekenkamer van Suriname/Supreme Audit Institution of Suriname)

Annex 10: Statement from the SHMR Board

Narrative SHMR Reference EITI Reports fiscal years 2021 and 2022

SHMR participated in the 2016 and 2017 Suriname EITI reports through a collective of 17 of its member companies. It was the intention of the SHMR Board to also participate in the reporting for fiscal years 2018, 2019 and 2020. However, the companies were not motivated and the Board thought it poor to participate with only a few companies.

For the 2021 and 2022 reporting again there was non-response from the member companies, although the Board informed them in due time and presented them, through mail, the BDO templates for companies.

Finally, there are 5(five) companies, to collectively present data for the 2021 and 2022 EITI reporting years. However, payments(e.g. royalty & rent for mining area) are presented collectively, while other information, such as company profile and Beneficial Ownership is presented by the individual company.

The SHMR Board fully supports the EITI standards and agrees to promote these standards in general but in particular with its member companies, in order to have more companies be willing and transparent about their data. The Board is working towards awareness with the companies; the 2023-2024 reporting will have a higher number of companies participating.

The SHMR Board must state, that demotivation and dis-interest from companies stem from 3(three) major facts:

a. Inactive Focal Point

The Geological Mining Service (GMD) for at least the last 20 years has been gradually losing its ability to function as a focal point on behalf of the Ministry of Natural Resources.

l when it comes to the process involving the application and granting/denying of a request of a mining right. The GMD receives the application and relevant documents and provides the applicant with a GMD number as proof of the application. After this moment, there is no communication from the GMD as to the status of the application. Applicants make phone calls to or visit the GMD in person, only to be informed that the application is still in process.

l the GMD tended to communicate information relevant to holders of a mining right; to date, holders of a mining receive and/or gather information mostly from the press. For example increase of the royalty percentage.

l Quarterly and annual reports must be presented to MONR, through the GMD. The processing of the data in the reports is not done. There is no database on the companies, gathering payments made, production of gold, etc.

b. No security of tenure.

The application of and/or the renewal(extension) of a mining right is ruled by the Mining Decree, 1986, no 28. Based on the legal framework, the granting of a mining right is to the discretion of the Minister of Natural Resources.

The mining decree 1986, does not limit the Minister as to completion of an application, i.e. to provide the applicant with a written answer as to the application.

There are cases known, where applicants, despite their telephone and written communications to enquire about the status of their application, have never received a written decision from the Minister or his delegate. When the application concerns the extension of a mining right, companies get frustrated, especially when considerable investments have already been made. Even worse for a company is a situation involving an investment partner, who tends to discontinue investments, until there is security of tenure.

If GMD calls an applicant, it is to inform on the granting of a mining right. If the mining is not granted, an applicant will not receive a letter informing on the denial of the application.

In 2020 and 2021, the SHMR Board has written letters to the Minister of Natural Resources and has even sought intervention from the President of the Republic of Suriname to come to a solution for this security of tenure problem. To date circumstances have not changed, while it is known to SHMR that companies have resorted to law suits against MONR.

c. Withholding of Royalty; No transparency

Art. 65 , mining decree 1986 no. 28, denotes the obligation of holders of the right to exploitation of gold, the right to small-scale mining and the right to quarrying of building materials to the payment of a royalty percentage.

The companies, as a result of lack of a transparent administrative system, have no proof that they comply with their royalty payment obligation. Produced gold, since 2000, is being sold to gold buying companies, who withhold the royalty percentage from the value of the gold being sold. The seller of gold receives a kind of receipt from the gold buying shop, only indicating the amount to be received by the selling company. The selling company can derive from the received amount, that based on the LME-price and the weight, that percentage was deducted from the purchase value. The percentage is always higher than the royalty percentage. It is unknown to the companies what is the basis of the percentage being withheld.

In 2021, on monthly average from one company 11.89% was withheld, whereby it is assumed that 4.5% is for payment of royalty by the company.

In 2022, on monthly average from one company 7.56% was withheld by the gold buying shop, whereby it is assumed that 4.5% is for payment of royalty by the company.

Each gold buying shop may withhold a different percentage.

The Annual Accountant Reports 2021 and 2022 from companies, do not include the payment of royalty because this cannot be accounted for by the company with a receipt. Some companies do include the 4.5% in their annual accountancy reports as royalties paid for selling their gold.

SHMR has been struggling to solve this non transparency in royalty withholding by the gold buying shops for years now. Meetings with MONR, MOFP and the Central Bank of Suriname, have to date not let to a transparent administrative procedure.

d. Informal Small-scale Mining and Criminality

Informal small-scale gold mining is a big challenge to holders of a mining right, because it may involve a large number of informal gold miners in the area of the holder of a mining right. Informal gold miners in some cases outgrow the number of employees of the company.

Criminality rates have gone way up these last years, while the existence of large groups of informal small-scale miners may add to higher rates of criminality. “Gold, knows no friends, only enemies”!

Insufficient government funds prevent the structural attack of the criminality problem in the gold fields to solve the issue of informal small-scale mining. The Minister of Natural Resources has indicated that it is the government's goal to legalize the informal small-scale gold sector. State Order 'SB. 2021 no. 151 of October 28, 2021 was issued for 3(three) years in order to make an inventory on the number of informal gold miners and the equipment and materials they use. SHMR in the early stage of the state order, was involved during two discussions on the implementation of subject order. However, lack of sufficient funds, resulted in non-implementation of state order no 151 of October 28, 2021.

SHMR is of the opinion that the companies were not adequately and effectively deemed a primary partner to the success of the implementation of this state order.

e. Community engagement and FPIC

FPIC (free prior and informed consent) is a key word in the extractive sector. However, companies are not informed by MONR on the rules and regulations for FPIC in Suriname. In 2021 and 2022, applicants have been requested to obtain the approval of the local community in writing, before their mining right could be considered. Applicants do want to comply with this condition, but it is in a lot of cases unknown who the local community is compared to the geographical location of the applicants' future mining area. MONR must elaborate, on standards of a 'Local Community'. Is a village, some 30(thirty) km from a mining area, a local community?

The application of FPIC should be unprecedented but clearly defined. If not so, this will cause unnecessary disturbance in the relationship between companies and local communities.

SHMR agrees to be part of FPIC promotion and awareness.

Annex 11: Narrative efforts en letter to director Grassalco

NARRATIVE

To : The Independent Administrator BDO Assurance N.V.

Regarding: Efforts made by the MSG and the EITI Suriname National Secretariat to promote and aide in the national reporting process

As part of its ongoing commitment to transparency and accountability in the extractive industries, the Multi-Stakeholder Group (MSG) undertook a series of strategic initiatives to sensitize and engage reporting entities, particularly those newly introduced to the EITI process. These efforts were essential in securing the accurate and timely submission of data required for the preparation of Suriname's EITI 2021-2022 Report.

Engagement with the Geological Mining Department (GMD)

In collaboration with the Geological Mining Department (GMD), the National Secretariat collected key production data relevant to the reporting period. This involved reviewing both quarterly and annual reports submitted by license holders. The Secretariat extracted and processed this information into structured Excel spreadsheets to ensure data consistency and facilitate efficient analysis.

Stakeholder Engagement Sessions

To build awareness and promote understanding of the EITI process, the MSG organized targeted engagement sessions with several key institutions, including the Central Bank of Suriname, Small Scale Gold sector regulation (OKGS), and the Chamber of Commerce and Industry. A tailored PowerPoint presentation was developed to explain the objectives of EITI, outline the specific data requirements, and highlight the importance of high-quality reporting in promoting national transparency. These sessions also provided a platform to clarify expectations and strengthen institutional collaboration.

Outreach to Gold Exporters

In parallel, the MSG previously engaged with BDO to facilitate early outreach to gold exporters. The objective was to ensure that exporters were informed of their reporting obligations and prepared to contribute relevant data in a timely and consistent manner.

Through these coordinated efforts, the MSG has demonstrated proactive leadership in promoting transparency and strengthening cooperation among reporting entities. These activities underscore Suriname's continued commitment to the principles of the EITI and its broader goals of good governance and responsible resource management.

Engagement with Oil and Gas Companies

As part of its broader stakeholder engagement strategy, the MSG conducted outreach to oil and gas companies operating in Suriname. This engagement yielded a positive response from Chevron, which expressed its willingness and readiness to sign a Memorandum of Understanding (MOU) in support of the EITI process. Following this development, the Minister of Natural Resources instructed the Ministry's Legal Department to review the matter and provide formal advice.

To support this process, the EITI Suriname Secretariat shared the 2023 EITI Standard and responded to various inquiries related to EITI requirements and expectations. This engagement remains ongoing, with the objective of finalizing the process through the Minister's formal signing of the MOU in the near future.

Engagement with the State Mining Company Grassalco

The issue of Grassalco's non-submission of required data has been a recurring topic of discussion within the MSG. On multiple occasions, the MSG has undertaken efforts to promote understanding and encourage cooperation from Grassalco in fulfilling its EITI reporting obligations. These efforts have included meetings with representatives of Grassalco, as well as direct engagement with officials from the Ministry of Natural Resources and His Excellency David Abia MOFP, Minister of Natural Resources and Champion of the EITI process in Suriname.

To formalize these efforts, the MSG prepared and sent an official letter to the President-Director of Grassalco, outlining the importance of the company's participation in EITI reporting. The Minister of Natural Resources was also copied in the correspondence. As of this writing, the MSG has not received an official response from Grassalco.

Recognizing the critical role of national companies in promoting transparency and good governance within the extractive sector, the MSG deemed it essential to take further steps by also sharing an identical copy of the letter with the Independent Administrator. These actions reaffirm the MSG's commitment to upholding the standards of the EITI and ensuring comprehensive participation from all relevant entities.

EITI Suriname

EITISR / 10.06 /2025

Betreft: dringend verzoek tot vrijgave van reeds verzamelde gegevens van Grassalco t.b.v. het 2021-2022 EITI rapport

Aan: De President - Directeur van N.V. Grassalco,
De heer Wesley Rozenhout PhD
Alhier

Paramaribo, 11 juni 2025

Geachte Directeur,

De Multi-Stakeholdersgroup (MSG) die de taak heeft de implementatie van de Extractive Industries Transparency Initiative (EITI) in Suriname te monitoren, nadert u hierbij met het volgende:

Suriname zit thans in een fase om het EITI-rapport 2021-2022 te finaliseren en daarna te publiceren. Als mijnbouwbedrijf, behoort Grassalco tot een belangrijke entiteit die data moet aandragen ten behoeve van het Suriname EITI-rapport..

Wij zijn verheugd te vernemen van uw vertegenwoordiging in de MSG en dat intern de nodige inspanningen zijn gepleegd om te voldoen aan deze verplichting. Voor zover wij begrijpen, kunnen deze gegevens worden vrijgegeven zodra daarvoor goedkeuring is verleend door de bevoegde autoriteit binnen uw bedrijf.

Reden waarom middels deze brief het dringend verzoek aan u wordt gedaan om de vrijgave van gegevens, die reeds door uw organisatie zijn verzameld.

Wij willen u erop wijzen dat de deadline voor het indienen van deze gegevens inmiddels is verstreken, en dat verdere vertraging aanzienlijke gevolgen kan hebben voor de score van Suriname bij EITI met betrekking tot het aspect "Transparantie". Het EITI-rapport wordt door investeerders als een belangrijk instrument gebruikt voor investeringen in de extractieve sector in Suriname.

Met de verwachte ontwikkelingen in de extractieve sector, waarbij er sprake is van buitenlandse investeringen kunnen wij ons als land niet permitteren dat een belangrijk staatsbedrijf niet voldoet aan haar rapportage verplichting. Ter uwe informatie hebben alle grote private bedrijven, waaronder multinationals en Staatsolie, reeds voldaan aan het aandragen van data.

RCF-06-0722 Caricom 10K Road Race

The race was held on 2 July 2022, a day before the Forty-Third Regular Meeting of the Conference of Heads of Government also opened in Suriname. About 100 participants competing in the open category, and athletes from six Member States, were at the Independence Square where a sizeable crowd that included CARICOM Secretary-General and other CARICOM officials had gathered to witness President of Suriname, Chandrikapersad Santokhi signal the start of the race. Rosebel Community Fund has agreed to donate medals, trophies, t-shirts and first aid standby for the Road Race on July 2nd, 2022.

Program expenses

"Program Services" or "Program Expenses" category: here is where you can list the costs directly related to providing gifts, supplies, food, and other items to beneficiaries. It showcases the resources spent on carrying out the core activities of the project.

A total of \$ 9.148 was donated to Christmas charity for cheques, cakes, baskets and photography.

RCF-2109-09 Stg. Suriname Conservation Foundation-Suriname Green Partnership Program (delayed)

Education & Research in Sustainable Management of Natural Resources program 2018 -2022 (ER-SMNR)" • The Project "ER-SMNR 2018 -2022" aims to provide a highly qualified master of science (MSc) program in "Sustainable Management of Natural Resources" at the Anton de Kom University of Suriname / Faculty of Technological Sciences (FTeW) with adequate research infrastructure, and quality education in sustainable agriculture, biodiversity, renewable energy, pharmaceutical biology, sustainable forestry, land, water management, and mineral resources. Ongoing projects. The total amount is USD 44,531 and the first payment is made on December 29, 2021. There was no payment made this year.

Ministry of Natural resources

In December 2020 approval was given for 3 projects in partnership with the Ministry of Natural Resources for an amount of USD 435,000. These projects are expected to be completed in February 2022.

It regards the projects:

- *ELECTRIFICATION SYSTEM*

SUSTAINABLE UPGRADE OF THE ELECTRIFICATION SYSTEM IN THE PIKIN SARACCA AREA DISTRICT SIPALIWINI. Introducing a hybrid system in the villages will fill in a serious gap by providing for a durable, reliable, less expensive, and environmentally friendly solution of energy supply to these 4 remote villages.

- *DRINKING WATER FACILITIES*

SUSTAINABLE UPGRADE OF THE DRINKING WATER FACILITIES IN THE PIKIN SARACCA AREA DISTRICT SIPALIWINI. The project has its focus on rehabilitation and upgrading the water distribution net and putting water purification systems in place to assure quality, safe and healthy drinking water. This will directly affect the hygiene, sanitation, and availability of safe drinking water for all persons living in these villages.

- **SAVING ENERGY AND INCREASING SAFETY**

LED Street lights in the district of Brokopondo- Suriname. Agreements drawn up between MNR, and Stg. RCF, the districts commissioner and traditional authority of Brokopondo. All payments will be made directly to the supplier. No payments will be made to the government. The rol of the government is to conduct the works as described in the project plan. MNR has indicated their own contribution.

RCF-03-0522 Medical Ambulance for Medical Mission (Ongoing)

The first payment USD 42.683 was made to The Netherlands in the name of Transmotors B.V. The remaining amount of USD 18.293 will be made in 2023.

7. Gross profit

In USD	2022	%	2021	%
Funds	1,088,215	100.0%	1,194,146	100.0%

Section 7. Terms of Reference

**REPUBLIC OF SURINAME
MINISTRY OF NATURAL RESOURCES
SURINAME COMPETITIVENESS AND SECTOR DIVERSIFICATION PROJECT**

Terms of Reference for Independent Administrator

December 2023

This TOR sets out the work to be undertaken by the Independent Administrator hired to produce the 4th Suriname EITI Report covering the years 2021 and 2022 and it is an integral part of the contract between the Independent Administrator and the Ministry of Natural Resources of the Republic of Suriname.

Table of Content

1. Background
2. Objective of the assignment and additional scope for 4th SEITI report
3. Scope of services, tasks and expected deliverables
4. Qualification requirements for the Independent Administrator (IA)
5. Reporting requirements and time schedule for deliverables
6. Client's input and counterpart personnel

Annex 2 – Supporting documents, to be decided in collaboration with the Multi Stakeholders Group or can be requested by the Independent Administrator

Terms of Reference

Independent Administrator for the 2021 and 2022 EITI Reports, Republic of Suriname

1. Background

The Republic of Suriname has received a loan from the World Bank for a Suriname Competitiveness and Sector Diversification (SCSD) project, which seeks to support private sector-led investment and competitiveness in targeted industries including mining, agribusiness, and tourism. The project will be implemented by Project Implementation Units (PIUs) at the Ministry of Natural Resources (MNR) under the guidance of a Project Coordination Committee (PCC). The project seeks to hire Consulting Services for an Independent Administrator (IA) to develop the 2021 and 2022 Extractive Industries Transparency Initiative (EITI) Report for the Republic of Suriname.

The Extractive Industries Transparency Initiative (EITI) is a global standard for improving transparency and accountability in the oil, gas and mining sectors.

EITI implementation has two core components:

- **Transparency:** oil, gas and mining companies disclose information about their operations, including payments to the government, and the government discloses its receipts and other relevant information on the industry. The figures are reconciled by an Independent Administrator, and published annually alongside other information about the extractive industries in accordance with the EITI Standard.
- **Accountability:** a multi-stakeholder group (MSG) with representatives from government, companies and civil society is established to oversee the process and communicate the findings of the EITI reporting, and promote the integration of EITI into broader transparency efforts in that country.

The EITI Standard encourages MSGs to explore innovative approaches to extending EITI implementation to increase the comprehensiveness of EITI reporting and public understanding of revenues and encourage high standards of transparency and accountability in public life, government operations and in business. The requirements for implementing countries are set out in the EITI Standard¹. Additional information is available via www.eiti.org.

It is a requirement that the MSG approves the terms of reference for the Independent Administrator (requirement 4.9.iii), drawing on the objectives and agreed scope of the EITI as set out in the MSG's work plan. The MSG's deliberations on these matters should be in accordance with the MSG's internal governance rules and procedures (see requirement 1.4.b). The EITI requires an inclusive decision-making process throughout implementation, with each constituency being treated as a partner. This TOR was approved by the EITI Suriname MSG on May 3rd, 2023

It is a requirement that the Independent Administrator be perceived by the MSG to be credible, trustworthy and technically competent (Requirement 4.9.b.ii). The MSG and Independent Administrator should address any concerns regarding conflicts of interest. The EITI Reports prepared by the Independent Administrator will be submitted to the MSG for approval and made publicly available in accordance with Requirement 7.1.

These terms of reference include "agreed-upon procedures" for EITI reporting (see section 4) in accordance

¹<http://eiti.org/document/standard>

with EITI Requirement 4.9.b.iii. The international EITI Board has developed these procedures to promote greater consistency and reliability in EITI reporting. The EITI process should be used to complement, assess, and improve existing reporting and auditing systems.

Suriname published its first EITI report regarding the year 2016 on May 23, 2019. This report had been validated in 2021 by the International board of the EITI. The second EITI Suriname report regarding the year 2017 was published on December 31, 2019 and also validated in 2021, thanks to the concerted efforts of the Independent Administrator, the Surinamese government and the Suriname MSG. The third and consolidated report covering the years 2018-2019-2020 was published on January 2023 and will be presented to the wider Surinamese community in June 2023.

The Surinamese government has taken concrete steps towards enhancing transparency in the extractives sector, including the publication of mining rights on the Ministry of Natural Resources' Geological Mining Department (GMD) website and regular publication of mining sector income data via on the Ministry of Finance website. These steps are seen as a clear indication of Suriname's government commitment to transparency in the mining sector and to the EITI standards.

2. Objectives of the assignment and additional scope for 4th EITI Report

On behalf of the government of Suriname and the EITISR -MSG, the Ministry of Natural Resources seeks a competent and credible firm, free from conflict of interest, to provide Independent Administrator services in accordance with the EITI Standard.

The objective of the assignment is to prepare the 4th EITI and consolidated report covering the years 2021 and 2022 in similar fashion as was done for the previous EITISR reports. Specific activities are noted below:

- Produce a limited scoping study to inform the MSG's decision on the scope of the 2021 and 2022 EITI Report;
- Produce an EITI Report for 2021 and 2022 in accordance with the EITI Standard and section 3, below;
- Perform other related tasks outlined in this Terms of Reference necessary for production of the EITI Report for 2021 and 2022.

Additional scope of work for the IA to be included in the 4th EITI report is listed below:

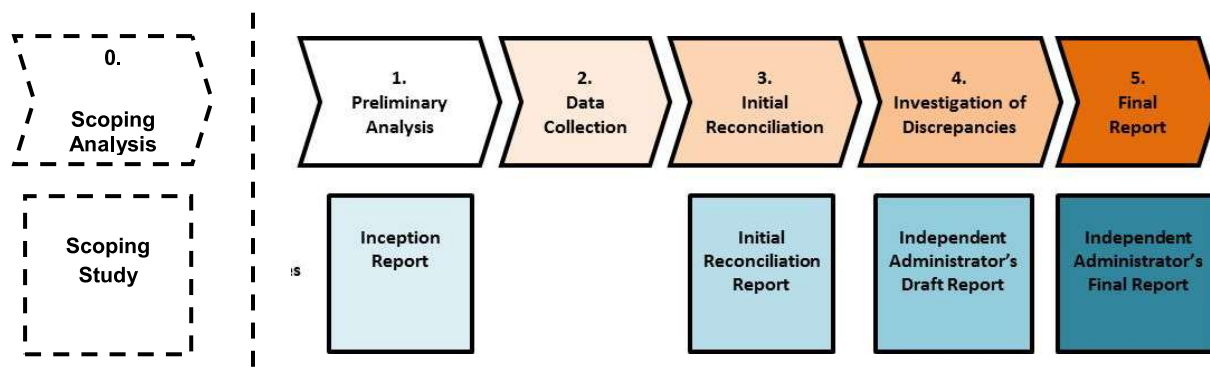

- Include royalty payments from Gold Exporters, given the materiality of their business (even though they are not primary producers), they will be asked to report.
- Improve and simplify the Input of the Data Templates, which are used by government and extractive companies. The simplified templates should be submitted to the MSG for approval. Following MSG final review and approval the Templates would be used for preparation of the 3rd EITI report.
- Report in accordance with the 2019 EITI standard: <https://eiti.org/document/eiti-standard-2019>

3. Scope of services, tasks and expected deliverables

The work of the Independent Administrator has five conceptual phases (see figure 1). These phases may overlap and there may be some iteration between the phases.

The Independent Administrator's responsibilities in each phase are elaborated below.

Figure 1 – Overview of the EITI Reporting process and deliverables

Phase 0 - Scoping and scoping study

Objective: Scoping work aims to identify what the EITI Report should cover in order to meet the requirements of the EITI Standard. Scoping sets the basis for producing a timely, comprehensive, reliable and comprehensible EITI Report. It commonly involves looking at issues such as the fiscal period to be reported, the contextual information that should be part of the EITI Report, reviewing the types of assurances that are needed for ensuring that the data submitted by reporting entities is credible. It is also an opportunity for MSG to consider the feasibility of extending the scope of EITI reporting beyond the minimum requirements in order to address the objectives outlined in the EITI work plan. Scoping may also investigate likely gaps or issues that may be particularly challenging to include in the EITI Report with a view to identify options, solutions, and recommendations for an appropriate reporting methodology for consideration by the MSG. It is to be expected that for the third report the scope will increase in the sense of number of reporting companies and sectors to be included, such as gold export and buying companies, small-medium scale mining and oil and gas companies. Given recent land-use conflicts on indigenous lands and the significance of social and environmental impacts of sand and quarry mining, the relevance of including this sector is becoming more evident than ever before. Including Oil & Gas companies is important since there are off shore investments taking place in with regard to oil and gas.

Note: As part of the scoping study, the materiality will be defined by the MSG taking consideration the recommendation of the Independent Administrator. One of the lessons from the first reporting cycle in this regard is that more detailed information on revenue streams is required to determine a materiality threshold that may enable inclusion of new sectors.

The purpose of this statement of materiality is for the Independent Administrator to understand the scoping work and associated decisions that have already been carried out by the multi-stakeholder group or by other consultants. The Independent Administrator confirms the joint understanding of the scope of the services in the inception report. The Independent Administrator will be responsible for defining government to government transfers/payments, which should be included in the EITI Report.

The Independent Administrator is expected to undertake the following tasks during the scoping phase.

a. With regard to timeliness of data:

- Assess the availability of data (both government and extractive industries) covering the calendar years 2021 and 2022 and advice on the feasibility of incorporating this data in the fourth EITI Report of Suriname.

b. With regard to legal framework, licensing, production and revenue allocations:

- Investigate the role of the state-owned enterprises in the extractive sector including the financial relationship with the government, quasi-fiscal expenditures, and government ownership in oil, gas and mining companies (requirements 2.6 and 6.2).
- Consider how extractive industry revenues, whether cash or in-kind, are recorded in the national budget (requirement 5.1), and opportunities for reporting on expenditures and revenue management as encouraged in requirement 5.3.
- Investigate the timeliness and comprehensiveness of the available information about license holders and license allocations in the sub-sector Small Scale Mining, as per requirement 2.2 and 2.3.
- Explore the data on oil and gas companies and included these in the report.
- Explore to what extent the information listed above is already publicly available and whether the EITI Report could include links to the existing information.
- Based on the above considerations, determine how each of the above points will be addressed in the EITI Report. The EITI Report should include full disclosure of the information, and identify challenges and weaknesses.

c. With regard to disclosure of revenues:

- Address the transactions between government entities (and other entities that collect revenues on behalf of the government) and state-owned companies (requirement 4.5). Including subsidiaries; the exact definition of what constitutes a subsidiary is to be included in the materiality note.

d. With regard to data quality:

- Investigate the prevailing auditing practices for company and government data.
- Assess whether the payments and revenues of companies and government entities are subject to credible, independent audit, applying international auditing standards (requirement 4.9.a).
- Consider the types of assurances that can be provided by companies and government entities to ensure a credible reporting process of the financial data.
- Document decisions taken on each of the points above.

The Independent Administrator is expected to lead discussions on the foregoing matters in coordination with the MSG and the Secretariat.

Phase 1 – Preliminary analysis and inception report

Objective: The purpose of the inception phase is to confirm that the scope of the EITI reporting process has been clearly defined, including identifying necessary updates to the reporting templates, data collection procedures, and the schedule for publishing the EITI Report. From the first reporting cycle, there is a need to update the reporting templates. This will be done starting with the fourth, the 2021-2022, Report.

The Independent Administrator is expected to undertake the following tasks during this phase:

1. Review the relevant background information, including the governance arrangements and tax

policies in the extractive industries, the findings from any preliminary scoping work. (A list of relevant documentation is provided as Annex 2).

2. The Independent Administrator should review the scope proposed by the MSG in Annex 1 with a particular focus on the following:
 - 2.1. Reviewing the comprehensiveness of the payments and revenues to be covered in the EITI Report as proposed by the MSG in Annex 1 and in accordance with EITI Requirement 4;
 - 2.2. Reviewing the comprehensiveness of the companies and government entities that are required to report as defined by the MSG in Annex 1 and in accordance with EITI Requirement 4.1;
 - 2.3. Supporting the MSG with examining the audit and assurance procedures in companies and government entities participating in the EITI reporting process. This includes examining the relevant laws and regulations, any reforms that are planned or underway, and whether these procedures are in line with international standards. It is recommended that the EITI Report includes a summary of the findings, otherwise the MSG should make the results of the review of audit and assurance practices publicly available elsewhere;
 - 2.4. Providing advice to the MSG on the reporting templates based on the agreed revenue streams to be reported and the reporting entities (1.2.1– 1.2.2 above). In the templates a provision requiring companies to report “any other material payments to government entities” above an agreed threshold, has been included.
 - 2.5. Submit for the MSG’s approval a work plan indicating its approach and methodology in producing the following outputs:
 - a. Fully accomplished reporting templates with complete and accurate data;
 - b. Reconciliation report and EITI report.
 - c. Summary EITI data report.
3. **On the basis of 1.1 and 1.2 as applicable, produce an inception report that:**
 - 3.1. **Includes a statement of materiality (Annex 1) confirming the MSG’s decisions on the payments and revenues to be covered in the EITI Report, including:**
 - The definition of materiality and thresholds, and the resulting revenue streams to be included in accordance with Requirement 4.1(b);
 - The sale of the state’s share of production or other revenues collected in-kind in accordance with Requirement 4.2;
 - The coverage of infrastructure provisions and barter arrangements in accordance with Requirement 4.3;
 - The coverage of social expenditure in accordance with Requirement 6.1;
 - The coverage of transportation revenues in accordance with Requirement 4.4;
 - Disclosure and reconciliation of payments to and from state owned enterprises in

accordance with Requirement 4.5;

- The materiality and inclusion of direct sub-national payments in accordance with Requirement 4.6;
- The materiality and inclusion of sub-national transfers in accordance with Requirement 5.2;
- The level and type of disaggregation of the EITI Report in accordance with Requirement 4.7;
- In any instances when any of the revenue streams required by the EITI Standard are not applicable in the context of Suriname, the Independent Administrator must explicitly state so in the report.

3.2. Includes a statement of materiality (Annex 1) confirming the MSG's decisions on the companies and government entities that are required to report, including:

- The companies, including SOEs, that make material payments to the state and will be required to report in accordance with Requirement 4.1(c);
- The government entities, including any SOEs and sub-national government entities, that receive material payments and will be required to report in accordance with Requirement 4.1(c-d), 4.5 and 4.6;
- Any barriers to full government disclosure of total revenues received from each of the benefit streams agreed in the scope of the EITI report, including revenues that fall below agreed materiality thresholds (Requirement 4.1(d));
- Update Reporting templates, where the Independent Administrator shall:
 - Together with the MSG during the third reporting cycle, document points of improvement for updating the reporting templates for the fourth reporting cycle identifying all revenue streams and information that should be provided by the reporting entities for the EITI Report.
 - Where necessary update guidelines for completing reporting templates.

3.3. Based on the examination of the audit and assurance procedures in companies and government entities participating in the EITI reporting process (1.2.3 above), confirms what information participating companies and government entities are required to provide to the Independent Administrator in order to assure the credibility of the data in accordance with Requirement 4.9.

The Independent Administrator should exercise judgement and apply appropriate international professional standards² in developing a procedure that provide a sufficient basis for a comprehensive and reliable EITI Report. The Independent Administrator should employ its professional judgement to determine the extent to which reliance can be placed on the existing controls and audit frameworks of the companies and governments.

Where deemed necessary by the Independent Administrator and the MSG, assurances may include:

- Requesting sign-off from a senior company or government official from each

² For example, ISA 505 relative to external confirmations; ISA 530 relative to audit sampling; ISA 500 relative to audit evidence; ISRS 4400 relative to the engagement to perform agreed-upon procedures regarding financial information and ISRS 4410 relative to compilation engagements.

reporting entity attesting that the completed reporting form is a complete and accurate record.

- Requesting a confirmation letter from the companies' external auditor that confirms that the information they have submitted is comprehensive and consistent with their audited financial statements. The MSG may decide to phase in any such procedure so that the confirmation letter may be integrated into the usual work program of the company's auditor. Where some companies are not required by law to have an external auditor and therefore cannot provide such assurance, this should be clearly identified, and any reforms that are planned or underway should be noted.
- Where relevant and practicable, requesting that government reporting entities obtain a certification of the accuracy of the government's disclosures from their external auditor or equivalent.

The inception report should document the options considered and the rationale for the assurances to be provided.

- 3.4. **Confirms the procedures for integrating and analyzing non-revenue information in the EITI Report.** The inception report should incorporate Table 1 below, confirming the division of labor between the Independent Administrator, the MSG or other actors in compiling this data, and how the information should be sourced and attributed.

Table 1 – Non-revenue information to be provided in the EITI Report

Non-revenue information to be provided in the EITI Report	Work to be undertaken by the Independent Administrator	Work completed/to be undertaken by the MSG/others
Legal framework and fiscal regime in accordance with EITI Requirement 2.1.		Review the legal framework and fiscal regime governing the extractive industries.
An overview of the extractive industries, including any significant exploration activities in accordance with EITI Requirement 3.1.		Identify and list the companies in the extractive industries, including any significant exploration companies
Information about the contribution of the extractive industries to the economy in accordance with EITI Requirement 6.3.	Identify sources and gather information available about the contribution of the extractive industries to the economy.	
Production and export data in accordance with EITI Requirement 3.2 and 3.3	Identify sources and gather production and export data	

Non-revenue information to be provided in the EITI Report	Work to be undertaken by the Independent Administrator	Work completed/to be undertaken by the MSG/others
Information regarding state participation in the extractive industries in accordance with EITI Requirement 2.6 and 6.2.	Investigate the role of any state-owned enterprises in the extractive sector, including the financial relationship with the government, quasi-fiscal expenditures, and government ownership in oil, gas and mining companies.	
Information about the distribution of revenues from the extractive industries in accordance with EITI Requirement 5.1.	Consider how extractive industry revenues, whether cash or in-kind, are recorded in the national budget.	
Any further information further information requested by the MSG on revenue management and expenditures in accordance with EITI Requirement 5.3.	Consider opportunities for reporting on expenditures and revenue management.	
Information about license holders in accordance with EITI Requirement 2.3, and the allocation of licenses in accordance with EITI Requirement 2.2.	Investigate the timeliness and comprehensiveness of the available information about license holders and license allocations in the sub-sector Small Scale Mining.	
Any information requested by the MSG on beneficial ownership in accordance with EITI Requirement 2.5		Design and publish a roadmap including milestones and deadlines, for disclosing beneficial ownership information in accordance with clauses (c) – (f) of EITI requirement 2.5.
Any information requested by the MSG on contracts in accordance with EITI Requirement 2.4		
[Add any other contextual information that the MSG has agreed to include in the EITI Report]	Based on findings from information above, advice the MSG on what information should be collected and what can be drawn directly from source.	Based on the output of the IA, determine what information should be collected and what can be drawn directly from source and agree on who should compile the information to be included in the EITI Report.

Non-revenue information to be provided in the EITI Report	Work to be undertaken by the Independent Administrator	Work completed/to be undertaken by the MSG/others
[Add any other contextual information that the MSG has agreed to include in the EITI Report]	Explore to what extent the information listed above is already publicly available and whether the EITI Report could include links to the existing information. Based on the findings from information above, advice how each of the above points will be addressed in the EITI Report. The EITI Report should include full disclosure of the information, and identify challenges and weaknesses.	

- 3.5. Highlights any unresolved issues of potential barriers to effective implementation, and possible remedies for consideration by the MSG.

- 1.4 Confirm the reporting templates, as well as any procedures or provisions relating to safeguarding confidential information.** The Independent Administrator shall assist the MSG in giving trainings to reporting government agencies, extractive companies and CSOs in connection with the reconciliation process.

Phase 2 – Data collection

Objective: The purpose of the second phase of work is to collect the data for the EITI Report in accordance with the scope confirmed in the Inception Report. The MSG and national secretariat will provide contact details for the reporting entities and assist the Independent Administrator in ensuring that all reporting entities participate fully.

The Independent Administrator is expected to undertake the following tasks during this phase:

1. Distribute the reporting templates, collect the completed forms, and associated supporting documentation directly from the participating reporting entities, as well as any contextual or other information that the MSG has tasked the Independent Administrator to collect in accordance with 1.3.4above.
2. The Independent Administrator shall ensure that the request for data includes appropriate guidance to the reporting entities, and on where to seek additional information and support, as well as a request for written explanation should any entity refuse to disclose any or all requested data or information.
3. Contact the reporting entities directly to clarify any information gaps or discrepancies.
4. Obtain any additional information from the extractive companies and government agencies necessary to carry out the reconciliation, including requesting any other data not included in the reporting template and documents in support of the information provided in the template.
5. Demonstrate to the reporting entities how to properly fill in reporting templates.

6. Request that templates are completely filled in by reporting entities and employ all measures to encourage that each entity submits complete information.

Phase 3 – Initial reconciliation

Objective: The purpose of this phase is to complete an initial compilation and reconciliation of the contextual information and revenue data with a view to identify any gaps or discrepancies to be further investigated.

The Independent Administrator should undertake the following tasks during this phase:

1. Compile a database with the payment and revenue data provided by the reporting entities and ensure access by the MSG to such database.
2. Comprehensively reconcile the information disclosed by the reporting entities, identifying any discrepancies (including offsetting discrepancies) in accordance with the agreed scope and any other gaps in the information provided (e.g. assurances). The Independent Administrator shall discuss with the MSG further actions it should take in explaining the discrepancies.
3. Prepare an initial reconciliation report based on the reported (unadjusted) data for consideration by the MSG in accordance with the agreed scope. The said report shall be submitted to the MSG one week before the presentation of findings to the MSG.
4. Recommend, should the MSG wish, an acceptable margin of error in determining which discrepancies should be further investigated. Where this has been agreed, the preliminary margin of error established at 5% of total revenues.

Phase 4 – Investigation of discrepancies and draft EITI Report

Objective: The purpose of this phase is to investigate any discrepancies identified in the initial reconciliation, and to produce a draft EITI Report that compiles the contextual information, reconciles financial data and explains any discrepancies above the margin of error determined by the MSG, where applicable.

The Independent Administrator should undertake the following tasks during this phase:

1. Contact the reporting entities to clarify the causes of any significant discrepancies or other gaps in the reported data, and to collect additional data from the reporting entities concerned.
2. Submit a draft EITI Report to the MSG for comment that comprehensively reconciles the information disclosed by the reporting entities, identifying any discrepancies, and reports on contextual and other information requested by the MSG. The financial data should be disaggregated to the level of detail agreed by the MSG and in accordance with requirement 4.7. The draft EITI Report should:
 - a) Describe the methodology adopted for the reconciliation of company payments and government revenues, and demonstrate the application of international professional standards.
 - b) Include a description of all revenue streams, related materiality definitions and thresholds (Requirement 4.1).
 - c) Include an assessment from the Independent Administrator on the comprehensiveness and reliability of the (financial) data presented, including an informative summary of the work performed by the Independent Administrator and the limitations of the assessment provided. The Independent Administrator should assess the process of data collection of the companies and the agencies and report on the reliability of data collection and validity and accuracy of the data.
 - d) Indicate the coverage of the reconciliation exercise, based on the government's disclosure of total revenues as per Requirement 4.1(d).
 - e) Include an assessment of whether all companies and government entities within the

agreed scope of the EITI reporting process provided the requested information. Any gaps or weaknesses in reporting to the Independent Administrator must be disclosed in the EITI Report, including naming any entities that failed to comply with the agreed procedures, and an assessment of whether this is likely to have had a material impact on the comprehensiveness of the report.

- f) Document whether the participating companies and government entities had their financial statements audited in the financial year(s) covered by the EITI Report. Any gaps or weaknesses must be disclosed. Where audited financial statements are publicly available, it is recommended that the EITI Report advise readers on how to access this information.
 - g) Include non-revenue information as per Requirement 2, 3, 5 and 6 and other information requested by the MSG. The contextual information should be clearly sourced in accordance with the procedures agreed by the Independent Administrator and the MSG.
 - h) Include a discussion on the reporting cycles of the reporting entities and availability dates of data.
 - i) Include a discussion on the flow of revenue streams and how transfers are facilitated between the different levels of government offices.
 - j) Provide an in-depth analysis of the data generated by the Report, not just on the contribution to the economy but also the accuracy and consistency of the numbers based on existing laws and regulations. It should determine whether the figures are in compliance with the law.
3. The Independent Administrator should make recommendations for strengthening the reporting process in the future, including any recommendations regarding audit practices and reforms needed to bring them in line with international standards, and, where appropriate, recommendations for other extractive sector reforms related to strengthening the impact of implementation of the EITI on natural resource governance. The Independent Administrator is encouraged to collaborate with the MSG in formulating such recommendations.
 4. The Independent Administrator is encouraged to make recommendations on strengthening the template Terms of Reference for Independent Administrator services in accordance with the EITI Standard for the attention of the EITI Board.
 5. The Independent Administrator should work in coordination with the MSG tasked to write the contextual information to make sure their findings and conclusions are consistent.
 6. A draft narrative of all findings for this phase shall be submitted to the MSG 2 weeks before the presentation of the findings to the MSG.

Phase 5 – Final EITI Report

Objective: The purpose of this phase is to ensure that any comments by the MSG on the draft report have been considered and incorporated in the final EITI Report.

The Independent Administrator should undertake the following tasks during this phase:

1. The Independent Administrator will submit the EITI Report upon approval to the MSG. The MSG will endorse the report prior to its publication and will oversee its publication. Where members of the MSG decide to include additional comments in or opinions on the EITI Report, the authorship should be clearly indicated.
2. The final EITI Report (the popular and official version) must be in English and translated to Dutch.

3. The Independent Administrator should produce electronic data files³ that can be published together with the final Report. For this purpose, the Independent Administrator should encode the data from the templates and the companies' financial statements into the dataset that can be analyzed using statistical software. A codebook should accompany such dataset.
 - a. Following approval by the MSG, the Independent Administrator is mandated to submit summary data from the EITI Report electronically to the International Secretariat according to the standardized reporting format available from the International Secretariat⁴.
 - b. The Independent Administrator shall ensure that the final Report contains all the comments of the MSG on the draft report, making sure that all concerns raised by the reporting entities have been sufficiently addressed before the final Report is submitted.
 - c. The Independent Administrator shall propose a scope for the next EITI Report.
 - d. The Independent Administrator shall submit its final Report to the MSG 2 weeks before the findings are presented to the MSG
 - e. The Independent Administrator shall conduct a report analysis workshop with the MSG members and key stakeholders immediately after publication of the Report.
 - f. The Independent Administrator shall take appropriate measures to ensure that the report is comprehensible. This includes ensuring that the report has high levels of readability, legibility and usability. The report must be edited by a professional copy-editor and/or be designed by a professional graphical designer.
 - g. The Independent Administrator shall submit to the SEITI Secretariat all documents and data gathered during reconciliation available, including the contact information of all institutions contacted during the reporting process.

4. Qualification requirements for Independent Administrators

The reconciliation of company payments and government revenues must be undertaken by an Independent Administrator applying international professional standards (requirement 4.9). It is a requirement that the Independent Administrator is perceived by the MSG to be credible, trustworthy and technically competent (ibid). Bidders must follow (and show how they will apply) the appropriate professional standards for the reconciliation / agreed-upon-procedures work in preparing their report.

The Independent Administrator will need to demonstrate:

- Expertise and experience in the oil, gas and mining sectors, preferably in Suriname.
- Expertise in accounting, auditing and financial analysis.
- A track record in similar work. Previous experience in EITI reporting is not required, but would be advantageous.
- Working knowledge of legal, regulatory and fiscal legislation applicable to the extractive industries.
- Affiliation with an internationally recognized audit firm that has experience in preparing EITI or similar reports in extractive and financial sectors.
- At the minimum, the firm must be able to provide a support staff of certified public accountants in good standing with above-listed qualifications.
- The firm must have a senior writer and editor who will make sure that the Report is well written, comprehensible, coherent, and that there are no conflicting data in the entire document.
- Submission must include proof of relevant qualifications for key staffs.

³ The files can be in CSV or Excel format and should contain the tables and figures from the print report. In accordance with requirement 7.1.c, the multi-stakeholder group is required to make the EITI Report available in an open data format (xlsx or csv) online.

⁴ The latest version of the summary data template can be found at: <https://eiti.org/document/eiti-summary-data-template>

- The Independent Administrator must have no conflict of interest as determined by the MSG and in compliance with WB Procurement Rules. In order to ensure the quality and independence of the exercise, Independent Administrators are required, in their proposal, to disclose any actual or potential conflicts of interest, together with commentary on how any such conflict can be avoided.

Other Responsibilities:

- Monthly status reports: the monthly status report must document the efforts made in the completion of each phase of the project. The IA will draft the initial monthly status report template to be agreed upon by the MSG.
- The report shall include but is not limited to the following requirements:
 - project status, to include objectives met, work completed and work outstanding;
 - notable achievements/non-achievements;
 - Issues or obstacles impeding progress and recommended solutions;
 - description of work completed and plans for the following month;
 - summarize the efforts of each phase in the Terms of Reference;
 - update on project personnel/staffing with contact information.
